

New Toshiba T10 All-in-One POS

Perfect Mix of Value and Performance

The Toshiba T10 is thoughtfully crafted with features you need and designed for the way you work. The unique small form factor design of the Toshiba T10 conserves retail space by fitting easily into the most compact of counter spaces.

The primary display easily adjusts and conveniently folds so it can be used as a stand-alone concierge kiosk that acts as a virtual sales assistant, embedded into the counter as a self-service terminal, or even mounted on the wall, allowing for installation in any location. The dual display option allows you to tailor the information shared directly with the shopper ultimately transforming your retail store into a retail experience.
